## Determining movement between phases

Government strategy will determine movement between the phases linked to national monitoring of the R rate.

## Determining movement between the stages of phase 3

Local indicators need to be met to move from one stage to the next:

- Is there the physical space to introduce the additional cohort(s) whilst maintaining the government guidance on class sizes?
- Is there staffing capacity to introduce an increase in cohorts based on government guidance on class sizes?
- Are we happy with the current operations and logistics of the model as it stands before opening to additional numbers of children?
- Can all controls and systems be maintained with expanding numbers?
